# TOP CHALLENGES FOR THOSE MANAGING BENEFITS

Here's a quick look at the key challenges facing many benefit administrators in 2021.

Hint: manual processes may be more costly than you think.

## COMPLEXITY OF BENEFITS

Organizations have gone from offering a few benefits to a wide array. This has greatly complicated billing and payment. Vimly OneBill®consolidates all bills, collects payments, and automatically disburses the correct share to all stakeholders.
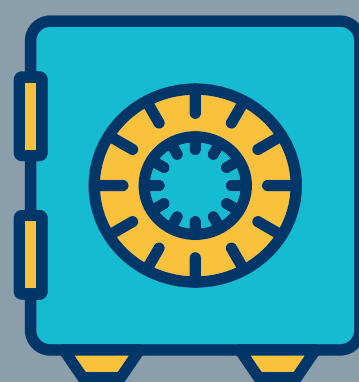

## PREMIUM OVERPAYMENTS

Recent studies show that 12 - 15% of carrier bills have errors. Even at 10%, how much might you save each year by moving from manual billing processes to Vimly OneBill® our automated billing, reconciliation, and payment solution?
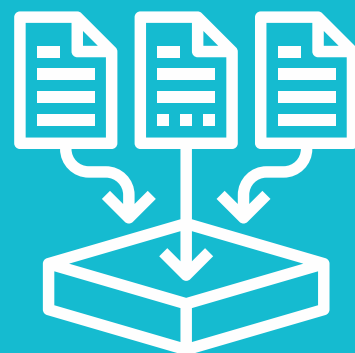

## SECURITY RISKS

Highly sensitive health information stored on spreadsheets and delivered via email are much more susceptible to security breaches than those stored and relayed on encrypted cloud-based platforms such as ours. And we are HiTrust Certified.

## INFERIOR DATA QUALITY

Manual processes increase your risks for data entry-related mistakes and lack audit trails for capturing changes, notes, and approvals. The result can be overpayments, increased workloads, and not meeting growing regulatory requirements.

See how our cloud-based platform can simplify enrollment, billing, and payment for your organization.
